MTN WEB STORE APP RELEASE NOTES
30TH NOVEMBER 2022

By MTN Web Store Team

TABLE OF CONTENT

NEW FEATURES

LOGO IMAGE FILE UPLOAD FOR WEB STORE PROFILE

Aligned with October 2022 updates, we've extended our file upload features to our Web Store Profile Setup Page. Users can now upload their company logo right away from their local device storage without having to upload to their 3rd party cloud storage and then copy the link from there, i.e. Google Drive, Dropbox etc.

Like the social image file upload feature announced earlier, this logo image file upload also allows you to preview the logo image after uploading. But for this release, the need to upload your custom social image for your Web Store Profile has been temporarily dropped until further notice. However, the social image of your web store profile will still be defaulted to the MTN default web store profile image so that you still can share your web store profile on your favourite social networks with thumbnail image.

For more information on the standard specification of MTN file upload features, please refer to the 31 October 2022 Release Notes.

OTHER NEW CHANGES

Besides the Logo Image File Upload feature on Web Store Profile Setup Page, below are the new changes being made to MTN Web Store:

1. Added **`Real Estates/Properties`** to the **Industry** dropdown list on the Sign-up Page.
2. The Free Listing Page (`/free-listing`) has been permanently redirected to `/free-online-marketplace`. The page has been re-titled to **Free Online Marketplace in Malaysia** and the content has also been updated.
3. Re-optimized digital marketing category page for greater sense and less confusing by changing the page title to "**Marketplace for Digital Marketing Agencies in Malaysia**". The description has also been updated.
4. Improved higher contrast of web store color scheme.

BUG FIXES

CREATE/EDIT PDF VIEWER

1. **FIXED:** The custom call-to-action button appeared twice during the preview mode.
